# Accelerating
# Cloud Innovation

## About AllCloud

AllCloud is a global professional services company providing organizations with the tools for cloud enablement. Through a unique combination of expertise and agility, AllCloud accelerates innovation and helps organizations fully unlock the value received from cloud technology.

As an AWS Premier Consulting Partner and a Salesforce Platinum Partner, AllCloud helps clients connect their front office and back office by building a new operating model that allows them to harness the benefits of both Salesforce and AWS. Supported by a robust ecosystem of technology partners, proven methodologies, and well-documented best practices, AllCloud elevates its customers by achieving operational excellence on the cloud, at every milestone of the journey to becoming cloud first.

With over 11 years of experience and a portfolio with thousands of successful cloud deployments, AllCloud serves clients across the globe. AllCloud is headquartered in Israel with offices in North America and Europe.

AWS PARTNER NETWORK

## Our Services

### Architect

- AWS Well Architected Program
- Security & Compliance Workshop
- Automation Workshop
- Enterprise Landing Zone
- SaaS Builders Program

### Build

- Scalable AWS deployment
- Security best practices
- Compliance (PCI, HIPAA, ISO, SOX, SOC)
- Continuous Integration/Continuous Delivery (CI/CD)
- VMware Cloud on AWS

### Operate

- Managed Service Provider (MSP)
- 24/7 Managed Security (MSSP)
- DR-as-a-Service
- DevOps-On-Demand
- Ongoing cost optimization

## Ask us about the AWS Partner Accelerator Program

# Secure Migration

We understand that working within or migrating to the cloud comes with its challenges, our focus is to provide you with the necessary tools for a successful cloud migration and a continuously optimized environment that is secure, scalable and managed to meet your performance and cost needs.

AllCloud has developed a cloud implementation framework "The Enterprise Landing Zone" which is a secure and automated enterprise-grade technology based on AWS best practices and years of experience with cloud deployments, the Landing Zone setup allows customers to quickly and easily migrate and manage their resources on AWS.

We aim to deliver our customers with 3 valuable results:
1. Immediately: A secure quick start
2. Short term: Operational excellence on the cloud
3. Long term: Embedded methodologies and self-sufficiency

Our success is measured by the time it takes an enterprise to become self-sufficient in adopting and operating cloud technologies atop AWS. We monitor KPIs such as: self-service adoption, pace of innovation, level of security, speed of workload migrations to new cloud environment.

## Plan your secure migration today, talk to our cloud security experts!

*"Based on their proven experience with similar migrations, AllCloud was able to provide us with best practices related to cloud security, cloud architecture and cost optimization for our IT migration to Amazon Web Services.*
